

Join in • Move Forward • Enjoy the ride

ECC Values

1) Supportive Community

We are honest and humble, knowing our own limits and asking for help when needed. We give clients, colleagues, and associates more than they expect. We communicate clearly and directly; gossip is not tolerated.

2) Quality Training

We never stop learning and growing. We are invested in helping our clients move forward, so we become experts in our specialties to do just that. We review the ethics code regularly. (We *try* to review relevant statutes every now and then.)

3) Good Humor

We look for ways to inject fun into our work. We laugh at ourselves.

ECC has a two-fold Mission:

Envision Counseling Clinic seeks to improve mental health and strengthen relationships. We help clients find relief, face challenges, and forge new paths: paths that lead to life. Our therapists integrate Christian beliefs with sound psychological research, and respect the complicated nature of our clients' concerns. We bring together mental health professionals with a wide range of specialties, to help many clients open up new possibilities and move forward.

Envision Counseling Clinic provides our therapists with community and training in order to nourish them, maintain accountability, and sustain their ability to care for clients. We value supportive community, continued growth in skillful and ethical practice, as well as humor to enjoy the ride. Envision therapists are “all in” – caring about each other and the community in which we live.
